TITLE OF THE STUDY 研究課題

Optimized decision-making models for facilitating adaptive reuse of vacant industrial buildings for residential use

優化決策模型以促進空置工業建築的適應性再利用為住宅用途

You are invited to participate in a research study conducted by Prof Dr. Ruffina Thilakaratne in the Department of Architecture at the Hong Kong Chu Hai College, in collaboration with, Dr. Too Wing Tak of Hong Kong Chu Hai College and Prof. Sara J Wilkinson at the University of Technology Sydney.

您被邀請參加由香港珠海學院建築系的 Ruffina Thilakaratne 教授/進行的研究，此項目與香港珠海學院的杜永德博士和悉尼科技大學的 Sara J Wilkinson 教授合作進行。。

PURPOSE OF THE STUDY 研究目的

Since adaptive reuse process inherits challenges due to multiple factors influencing the decision-making process, this research aims to identify critical factors influencing the process and develop a model for optimizing the decision-making process. The survey will be conducted in an engaging manner providing you the opportunity to provide your opinions related to adaptive reuse process, i.e. such as whether we should demolish industrial buildings or convert them for housing, your views about the sustainability of adaptive reuse, what are the concerns of converting industrial buildings for housing, what are the challenges, how could we make this process more efficient etc.

PROCEDURES 程序

The following procedures are involved:

- After identifying critical criteria, an online questionnaire survey will be conducted to receive feedback from professionals. These data sets will be used to develop weighted scoring for the decision-making model.
- At the stakeholder engagement forum interviews with stakeholders such as building owners, authorities, and the surrounding community, will be conducted to extract their opinion on critical factors related to adaptive reuse.
- Suitable implemented projects from Hong Kong, Singapore, Australia and the Netherlands will be studies to derive and correlate parameters with literature review findings. This process will involve desktop studies and in some instances obtaining information from the project teams.
- Online survey and face to face / virtual meeting
- Participants will have the opportunity to provide their opinion and listen to other opinion and engage in discussion in a well guided setting.

- Photographs and audio recording for developing transcripts will be take with the consent from the participants.
- Online survey would take less than 15mins and the stakeholder forum about 60 mins.

RISKS AND BENEFITS 風險及利益

This procedure has no known risks. 此程序不涉及已知風險。 ”

There are no direct benefits to you. However, your participation can provide valuable data for the study of **Optimized decision-making models for facilitating adaptive reuse of vacant industrial buildings for residential use.**

是次研究並不為閣下提供個人利益，但所搜集數據將對<此研究課題>提供寶貴數據。 ”

PRIVACY AND CONFIDENTIALITY 私隱保密

No personal data will be collected. Disclosure of participants' identity or contact details is entirely voluntary. Such data will be treated in compliance with the laws of Hong Kong, including the Personal Data (Privacy) Ordinance (Cap 486).

Participants' data will be treated anonymously as the research does not aim to generate correlations with participants' data and their opinions. All transcripts will be anonymous. Photos taken will not be shared among participant to respect each other's privacy.

During the stakeholder meetings, participants will be reminded to keep the information confidential.

Data collected from this study will only be used for research purpose and the participants have the right to request the transcript of the discussions.

Overseas case study data collection will adhere to the same procedure and conditions.

Only the research team will have the access to collected data.

All collected data will be stored in a cloud account with a secured password. Only the research team will have the access to collected data. Data will be destroyed five years after completing the study.

Researchers shall adhere to the Personal Data (Privacy) Ordinance (Cap. 486) when the research data contain personal information and identifiers.

PARTICIPATION AND WITHDRAWAL 參與及退出

Your participation will provide valuable data that can inform future practices in this field.

However, your participation in this survey is entirely voluntary and you have the right to withdraw from this study anytime without any negative consequences and penalty. Thank you for your valuable time and insightful feedback.

QUESTIONS AND CONCERNS 查詢及意見

If you have any questions about the study, please feel free to contact Prof Dr Ruffina Thilakaratne, the Principal Investigator as below.

如你對是項研究有任何查詢，請與研究員 Ruffina Thilakaratne 教授聯絡。

Information of the Principal Investigator / Researcher 首席研究員資料

Name:	Prof. Dr. Ruffina Thilakaratne
姓名:	
Post Title:	Professor
職位:	教授
Department/Unit:	Architecture
學系/單位:	建築系
Institution:	Hong Kong Chu Hai College
院校:	香港珠海學院
